MANO XL

The Xtra Large magnifier

The brand new opto-electronic magnifier MANO XL offers a 7" display, a continuous magnification of up to 37x and is compact in design and light weight.

Due to the auto focus and the high resolution HD camera, all text and pictures are being displayed in razor sharp quality and contrast enhanced.

With the innovative distance view mode, you can also look at objects around you, like street signs. Just take a snapshot, enlarge it and choose your preferred contrast enhancement for comfortable reading according to your individual needs. If you wish, you can also save the image permanently in the gallery.

Connect MANO XL with an external monitor or TV via the integrated HDMI port and look at your photos or documents at an even higher magnification level.

Your benefits at a glance

- large, matt 7" display (approx. 17,8cm diagonal)
- continuous magnification from approx. 2x to 37x
- in all magnification levels a razor sharp picture display due to HD camera and autofocus, snapshot function
