topolino flex *2K*

The camera system with 2K resolution for more working space

The camera system topolino flex *2K* offers you the greatest possible working space on your desk. The high-resolution camera (2.5x HD resolution) is attached to a three-joint swivel arm on the desk. This allows you to move the camera at different angles across the entire workspace and display the image on a monitor. All individual adjustments in terms of colors, magnification, etc. are being saved automatically when switched from reading mode to distance viewing mode.

Via an HDMI interface, topolino flex can be connected directly to a monitor or connected to a PC or laptop via USB3.0. Your external *2K* monitor can be connected via HDMI interface with topolino flex *2K*. Your PC or laptop can be connected via USB 3.0. Functions for your comfort, like line ruler or line masking can be activated via topolino remote control and the Viewer Software SuperNova for Window.

Your benefits at a glance
