topolino mini

The camera system with OCR for iPad, Windows, and more

topolino mini is a camera system featuring a swiveling and extendable camera that delivers outstanding image quality thanks to dual Full HD resolution and a 10x optical zoom. The field of view can be adjusted to produce a distortion-free image, even if you're not sitting in the center of the room—and this is possible even during real-time playback.
In addition to standard magnification features, the versatile software also enables text capture with automatic language recognition in more than 30 languages. Documents and images can also be imported and used within the software. The high-speed multi-page capture feature is ideal for saving larger files and viewing them later directly in the software.
topolino mini does not require its own power source, and thanks to its light weight and the included carrying case, it can be used quickly and easily anywhere.

Your benefits at a glance

- Camera with 10x optical and 8x digital zoom
- Real-time video correction for a distortion-free image
- Height-adjustable stand with three mounting options: can be used as a distance camera with the folding stand; can be used as a distance or document camera with the table clamp or the stand with base plate
- Dual Full HD resolution at 30 frames per second for an exceptionally sharp image (Full HD resolution at 60 fps recommended for fast-moving objects)
- Optical image stabilizer
- Connects via USB-C with only approx. 1 watt of power consumption
- Lightweight at just 350 g (without base plate)

Currently, not all features are available on all operating systems.
The software is constantly being developed and updated.

The software at a glance

- Powerful OCR and TTS functions
- High-speed multi-page scanning
- Search function, navigation via shortcut commands
- Support for over 30 languages with automatic language detection and switching
- Import/export options for PDFs, Word documents, image files, MP3s, and much more.
